Business Continuity Planning Notice

Effective Date: August 2025

IronArc Management, LLC (“IronArc”) has developed a Business Continuity and Disaster Recovery Policy designed to ensure the Firm can continue operations or recover promptly in the event of a significant business disruption (“SBD”). Since the timing and impact of such disruptions are unpredictable, IronArc’s response is flexible and guided by the principles below.

Contacting Us

If you cannot contact us through normal means following a significant business disruption, please visit our website at www.ironarcventures.com.

Our Business Continuity Plan- We plan to quickly recover and resume business operations after a significant business disruption and respond by safeguarding our Employees and firm property, making a financial and operational assessment, and protecting client information and firm records. Our business continuity plan is designed to permit our firm to resume operations as quickly as possible, given the scope and severity of the significant business disruption.

The plan addresses: Data backup and recovery; access to mission critical systems; alternative communication methods with clients, employees, and regulators; Use of alternate work locations or remote access via VPN and secure cloud systems by Employees; and Coordination with critical vendors, custodians, and counterparties.

Client Access to Funds

IronArc does not maintain physical custody of client funds or securities. Clients’ assets remain safely held with qualified custodians.

Varying Disruptions

The severity and scope of a disruption may affect only our office or extend regionally. IronArc will relocate operations or transition to remote access as necessary to maintain business continuity. In all cases, we will communicate through available channels—email, phone, or website—to provide updates.

More Information
